

## SAP SCM Training (SAP APO -PP)

1. Introduction to SAP APO
2. Basic Master Data and Transactional Data Elements
  - Master Data
    - i. Materials
    - ii. Customers
    - iii. Plants
    - iv. Vendors
    - v. Production version
    - vi. Purchase info record
  - Transactional Data
3. APO – Deep Dive
  - Demand Planning
    - i. Demand Planning Architecture(Configuration )
      1. Planning Object Structures
      2. Planning Areas& Planning books and Data views
      3. Characteristics
      4. Key Figures
    - ii. Forecasting
    - iii. Macros
    - iv. Alerts
    - v. Life cycle Planning
    - vi. Realignment & Copy
    - vii. Jobs and Process chains
    - viii. Integration with SNP.
  - Supply Network Planning (Configuration )
    - i. Product Master
    - ii. Location Master

# VtechSoft

## Solutions

- iii. Planning engines (Heuristics and Optimiser )
- iv. Capacity levelling
- v. Deployments
- vi. Transport Load builder
- vii. Transportation lanes
- viii. Quota arrangements
- ix. PPM and PDS
- x. Background Jobs
- xi. Process chains

➤ Production planning concepts

1. Configuration
2. Integration with SNP and ECC
3. Production strategies
4. Master Data Elements.

4. Core Interface

1. CIF Configuration
2. IM generation , Activation and Deactivation process
3. Inbound and outbound queue monitoring
4. CCR ,CPP monitoring

5. ECC (ERP Central component )

1. Configuration of ECC for Planning with SAP APO
2. Master data related to APO

6. Real time Scenarios

7. Knowledge on various kinds of projects
  - a. Implementations projects
  - b. Roll out projects
  - c. Up gradation projects
  - d. Support projects
